- Available with 8000 mm platforms as standard or optional 9000 mm version

Leviathan 16t 4 Post Commercial Vehicle Lift

GARAGE EQUIPMENT
since 1922

→ About the SF/8898/V

The Leviathan 16 tonne commercial vehicle lift from Tecalemit is a heavy-duty vehicle lift. The lift platforms incorporate both heavy gauge materials and unique design to ensure total lifting safety combined with unrivalled durability and performance. The lift is powered by a 5.5kW motor operated from a single control box mounted on the master column.

The lift has been configured to accommodate a broad range of longer wheel base vehicles, commercial vehicles and public service vehicles up to a gross vehicle weight of 16000kg.

Design features include additional width 3500mm between the columns (allowing access for vehicles with fixed rear view mirrors) and 810mm wide platforms to ensure that twin wheeled vehicles are fully supported by the platform.

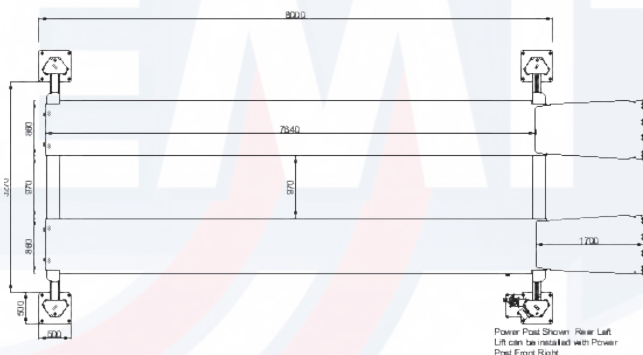

Installation of the lift should be in a covered area protected from prevailing weather. Consult your Tecalemit Area Sales Manager for details of floor specification and power supply requirements.

→ Technical Specifications & Dimensions

Platform length.....	8000mm
