

A/C Service and Recharge Unit for R134a Gas

GARAGE EQUIPMENT
since 1922

Part No.: AC/2750/23

See overleaf for more information

- Vacuum and recharge with electronic scales for R134a refrigerant
- Full automatic operation
- Automatic control of leaks
- 22 litre refrigerant tank
- Thermal printer with roll as a standard

A/C Service and Recharge Unit for R134a Gas

→ About the AC/2750/23

Tecalemit's Air Conditioning servicing machines are specifically designed to meet the needs of busy workshops that handle modern vehicle air conditioning systems.

The AC/2750/23 is a fully automated air conditioning recovery and recycling unit with a 22-litre refrigerant tank.

It comes with an LCD screen that displays instructions and settings, all enclosed in a robust cabinet.

The unit has a standard vehicle database that allows the operator to input the correct data for the vehicle being worked on without any hassle.

The automatic cycle will recover and recycle the refrigerant, remove and measure any recovered system oil, and extract the moisture from the vehicle system.

The AC/2750/23 can also be used manually to perform these tasks individually, enabling any repair work to be done on the system or elsewhere on the vehicle.

The electronic scales for refrigerant, discharged oil, and new oil guarantee the needed accuracy to meet even the strictest regulations.

→ Technical Specifications & Dimensions

Gas.....	R134a
Vacuum pump.....	4 CFM
Vacuum.....	4×10^{-2} mbar
Compressor power.....	0.25kW
Refrigerant tank.....	22l
Resolution gas scale.....	+/- 1g
Oil scale accuracy.....	+/- 1g
Recovery rate.....	330g/min
Charging pipes.....	3000mm
Dimensions.....	550 x 570 x 1220mm
Weight.....	80kg
Leakage detection.....	✓
Cylinder gauges.....	✓
Voltage.....	1ph 230V/50Hz
