

Motorcycle Roller Brake Tester Wall Mounted Display

GARAGE EQUIPMENT
since 1922

Part No.: DE/9015

See overleaf for more information

(Shown here with Head Lamp Beam Tester and alignment bars)

- Clear LED display
- Flush fitting rollers
- Starting safety device
- Analogue display of brake force
- Automatic zero calibration point
- DVSA approved for MOT application
- Accurate, consistent and reliable results
- Easy to use with remote control and automatic calculations
- Automatic built in 4 point weighing system for accurate calculations
- Digital display of maximum brake force, bike weight and retardation etc.
- Unique large wheel slip roller to better accommodate off-road tyres
- Epoxy corundum coated rollers
- Easy drive out mode
- Low speed rollers to avoid 'kick-out'
- Pedestal mounted display option available
- Roller covers to meet Health & Safety requirements
- Manual emergency stop button built in on display

Motorcycle Roller Brake Tester Wall Mounted Display

→ About the DE/9015

The DE/9015 is designed to meet the testing requirements of the most modern motorcycles. This reliable, robust, and maintenance-friendly brake tester analyses the condition of the brakes on almost all types of motorcycles, scooters, and sidecars.

This model offers a complete range of brake testing functions and is approved for UK Class 1 & 2 testing. Special attention has been given to prevent damage to the tyres. The rollers quickly stop when slippage occurs, even during the start-up of the motors.

The DE/9015 roller brake tester is equipped with a 4-point weighing system as standard. This system automatically weighs each wheel and can, therefore, calculate the brake efficiency for each brake control system by relating the brake forces of that system to the total weight of the motorcycle.

The DE/9015 requires a floor recess to be formed. An optional frame has been developed to help create an accurate recess. In addition, the large LED display can be mounted on a pedestal for extra flexibility in positioning the brake tester.

→ Options & Accessories

Pedestal for LED display.....OA/60028/2/RAL5002
Recess installation frame.....OA/60031/2
Alignment Bars & Cords.....OA/50681
Mini Plus Electronic decelerometer with triaxial measurement (motorcycle).....DE/9046
Class 1 & 2 MOT site pack.....OA/60415/1
Headlamp Beam Tester.....DE/7288/2005

→ Technical Specifications & Dimensions

Power.....1 ph, 240v/50Hz, 25a
Roller length.....300mm
Motor.....2.2kW
Roller distance.....400mm
Test speed.....2.9Km/h
Roller diameter.....206mm
Brake force range.....0 - 300 kgf
Slip roller diameter.....80mm
Max. wheel load.....750kg
Roller tester weight.....80kg
Roller surface friction.....0.9 dry > 0.6 wet
Display dimensions.....680 x 680 x 120mm
Wheel slip sensing.....Autostop
Chassis dimensions.....800 x 620 x 310mm
