more information*

- Generous platform dimensions
- Precision, mechanical latching system
- 5700mm platform length
- Suitable for use with a wide range of cars and LCV's
- Hydraulic & Mechanical safety systems with 24v controls

Quadra 5.0t 5.7m Wheel Alignment Lift

GARAGE EQUIPMENT
since 1922

→ About the SF/9008/7

The SF/9008/7 lift is supplied with platform recesses for radius turning plates along with ball bearing mounted rear slip plates for wheel alignment. It also benefits from an increased platform length making it ideal for general servicing and repair work on even the longer wheelbase LGV vehicles and motor caravans.

The electro-hydraulic operation ensures low maintenance, low running costs, high durability and outstanding performance. The Quadra 5.0t 4 post wheel alignment lift is an electro-hydraulically operated platform lift.

Designed specifically to provide an intermediate capacity lift and suitable in particular where workshop space is at a premium. With a platform length of 5700mm the lift is suitable for larger light goods vehicles.

The platforms are a generous 630mm in width, providing space for twin wheeled vehicles with one adjustable platform. The distance between platforms ranges from 825 -1025mm. This ensures easy accommodation of a large range of vehicles, including saloon cars if required.

→ Technical Specifications & Dimensions

Platform height min.....	190mm
Raised height.....	1830mm
Motor supply.....	2.2kW - 3ph
.....	230-400V/50Hz
Maximum load.....	5000 kg
Lifting time.....	50 secs
Lowering time.....	45 secs
Net weight.....	1230kg
Operation.....	Electro-hydraulic
