About the SF/9057/4

The SF/9057/4 Quadra 4.0t dual revenue lift is a 4-post lift developed for use for both wheel alignment and MOT testing. This versatile lift meets the dimensional requirements and technical specification set out by DVSA for Class 4 & 7 testing. It also incorporates heavy-duty, ball bearing mounted rear wheel slip plates; these enable adjustments to be made to rear wheel geometry settings without the need to re-set the vehicle between measurements.
