more information*

- Electronically controlled safety latches
- Suitable for general MOT servicing & repairs
- Compact space saving design
- Suitable for retro-fitting into existing MOT Bays

Quadra 3.5t 4.3m MOT & Service Lift

GARAGE EQUIPMENT
since 1922

→ About the SF/9436/SR

The Quadra SF/9436/SR lift is Tecalemit's general MOT & Service purpose 4 post platform lift recommended for use in car workshops. The lift has generous platform dimensions of 4300mm x 500mm but still maintains a compact overall length, including access ramps of under 5200mm.

The lift incorporates a complete range of safety features including mechanical and hydraulic safety systems. The floor onto which the lift is to be installed should be level +/-<8mm. The concrete pad onto which the columns are secured should be constructed of C30 concrete 160mm thick excluding the thickness of any screed or paving that may be added.

The SF/9436/SR requires a 3ph power supply via a fused isolator. Should a lighting kit be installed a neutral supply is required. Single phase option is also available.

→ Technical Specifications & Dimensions

Maximum load.....	3500kg
Raised platform height.....	1750mm
Lifting time.....	50 sec
Lowering time.....	45 sec
Power supply.....	3ph 400v 50Hz
Fused isolator rating.....	20 amp
Motor.....	2.2kW
Weight.....	830kg
Minimum height.....	170mm
