Selected MOT equipment requires connection to existing site broadband capability. These promotion offers cannot be combined with other Tecalemit offers.

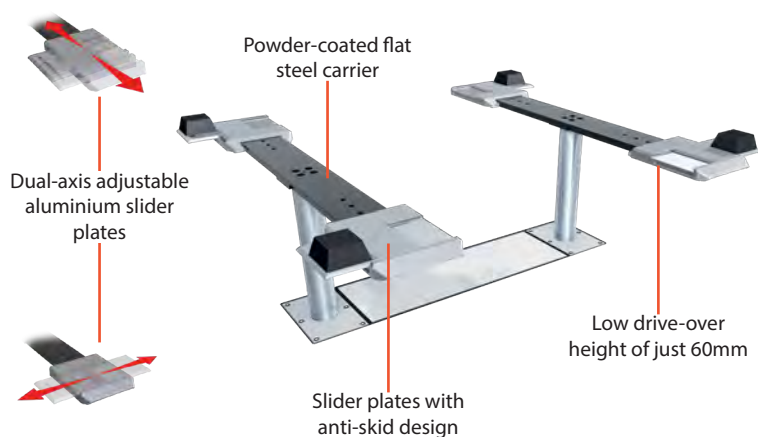

INGROUND LIFTS

HERRMANN

A lifting platform is an essential piece of equipment found in vehicle workshops all over the world. Whether it is for an inspection, servicing, or repair, using a quality lifting platform is crucial for getting the job done right. Herrmann understands this and has taken into account the various demands that modern vehicles require when developing their lifting platforms.

With over 50 years of practical experience, Herrmann is a pioneer in the vehicle lifting technology industry, always striving to improve their products. They continue to face new challenges while keeping in mind the fundamental principles of lifting. Herrmann's lifting platforms are more than just intricate systems; they are designed to support workshops in achieve their goals.

Junair is the UK's leading manufacturer of spray booths and paint finishing systems. From automotive accident repair spray booths to fully automated mass production paint finishing lines, if it can be done, they have probably already done it!

With over 30 years of experience in the spray booth industry, Junair can help you tackle your operational challenges. With their consultative approach, they will aim to provide the best solution for your needs in terms of efficiency and cost.

JUNAIR - NEVER COMPROMISING ON QUALITY

The winners of the 'Best Spray Booth Manufacturer' by ABP Club and over 30 years' experience in the spray booth and paint finishing industry, Junair have extensive knowledge which allows them to deliver spray booth solutions to their clients in the automotive, commercial, industrial, and aerospace sectors, tailored specifically to their requirements.

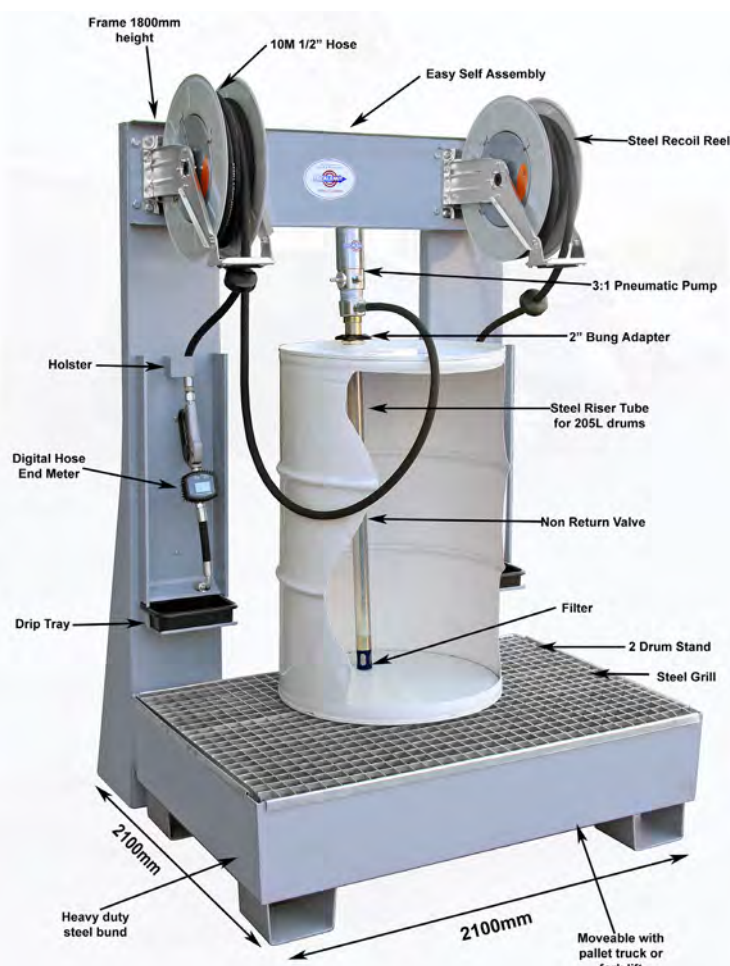

With a range of spray booth types and series of standard spray booths, Junair have most requirements covered, but are equally happy to speak to you about your options and deliver a tailor-made package to you that takes all your needs into account.

A quality spray booth from less than £1000 a month

The Junair 3 Series would typically be from around £900.00 per month on a 5 year Lease Agreement, based on Standard Car Booth 7 X 4 X 2.5m - LEVAC Floor

A LEVAC floor is a surface mounted design requiring no building excavation. Height from the building floor to the spray booth floor is only 180mm and only a small unobtrusive ramp is required to access the cabin, making it easy to load and unload products. Removing the excavation element significantly reduces installation time /costs and the disruption associated with builder's work.

**OIL DISPENSING STAND - LA/738/COMP**

The LA/738 is a bunded two barrel stand incorporating a hose reel frame with oil reels.

Oil bund for 2 x 205 litre drums

FROM ONLY £6725

from just
£35.15*
per week

INSTALLATION CASE STUDY

Giving The Blue Light To Lift Electric Vehicles

Humberside's Emergency Services Fleet Management (ESFM) is a joint venture company between the area's Police and Fire & Rescue services, providing fleet management and engineering technical support from a single location. This collaboration allows them to quickly adapt to operational priorities and support frontline services.

Recently, ESFM reassessed their vehicle lifting requirements and ascertained that they now needed to safely lift electric vehicles (EVs). After evaluating the various options, the team at ESFM decided that Tecalemit's SF/9235/EVR best suited their needs. The SF/9235/EVR is designed as an innovative and efficient lifting solution to accommodate the growing number of hybrids and EVs on the road.

With a lifting capacity of 3.5t, a fast lifting time of 45 seconds, adjustable arms and a low pad lifting height of just 95mm, the SF/9235/EVR is designed to make life easier. This versatile 2-post lift shines with its innovative EV lifting forks. Using the EV lifting forks is as simple as removing and replacing the lift pads with the forks. With no special tools, the switch can be made as easily as changing your shoes.

Regardless of the size of the workshop, Tecalemit is here to help you succeed, so contact us today to discover how you can benefit from our experience.

4-POST CV LIFTS

from just
£120.79*
per week

- Premium quality lifts manufactured in Europe
- Innovative design to accommodate many heavy vehicles
- Proven, reliable electro-hydraulic lifting system
- Self-contained safety systems - no compressed air needed
- Motor equipped with sensors to prevent overheating
- Option to add lighting kit for enhanced usability
- Choice of 12t, 16t, 25t or 30t capacities with 8m platforms

CV BRAKE TESTER

DVSA ATF Approved CV Brake Tester for Trucks, Coach & Bus

The DE/9700 CV Brake Tester from Tecalemit was the first commercial vehicle brake tester (CVBT) to be designed and manufactured specifically to meet the UK's Authorised Testing Facilities (ATF) testing requirements. Developed from Tecalemit's proven brake testing expertise and unique experience of UK statutory brake testing, the heavy-duty roller bed design includes as standard two high-performance 15kW motors and a 'soft-start' feature which generally are only available as upgrades from other manufacturers.
