

# Wireless Heavy-duty Column Lift - 30 tonne

GARAGE EQUIPMENT  
since 1922

**Part No.: SF/9490**

*See overleaf for  
more information*

- Lifting capacity of 7.5t per column
- Utilises wireless technology to safely lift a wide range of vehicles including Buses, Lorries and large vans
- Permanently safe load & safety lock design
- Electronic synchronisation of columns
- Operating controls on all columns

# Wireless Heavy-duty Column Lift - 30 tonne

GARAGE EQUIPMENT  
since 1922

## → About the SF/9490 range

The SF/9490 is a wireless 4-unit column lift powered by rechargeable 24v batteries. It benefits from an advanced synchronization system enabling the columns to rise and lower smoothly, even if the load is not the same for each column. A hydraulic pump powered by a 24v motor operates each column. For safety, a height limit switch automatically stops the lift once the maximum point is reached. The lifting will also stop when there is a difference of more than 50mm on any column. Each column also has a mechanical lock.

The SF/9490 displays the current lifting height, battery charge level, mode type, and other details. When the columns are in use, there are no cables or other trip hazards. Since the mobile columns are battery-powered, the columns can be easily relocated (when unladen) to numerous locations in the workshop. Each column has operation and emergency stop buttons for ease of use. As with all Tecalemit equipment, these lifts are fully certified. It also carries an IP54 rating meaning it is splash-proof.

## → Technical Specifications & Dimensions

Lifting Capacity.....	7.5t Per Column (30.0t Overall)
Max Lifting Height.....	1700mm
Voltage.....	24v
Motor Power.....	2.2kW
Column Dimensions.....	1300(L) x 1100(W) x 2300(H) mm
Fork Length.....	380mm
Fork Width.....	280 - 580mm
Weight.....	710kg (Per Column)
Lifting Time.....	120s
Battery Capacity.....	20 Up and Down cycles
Battery Charger.....	Single phase 220v
