## → About the SF/9095/EV

The SF/9095/EV range of long platform scissor lifts provides the complete solution for workshops servicing a broad range of cars and light goods vehicles. The vehicle lift is the largest revenue earner in the workshop and scissor lifts provide a super efficient space saving solution.

The SF/9095/EV can accommodate most cars and light goods vehicles up to a gross vehicle weight of 4500kg, creating a highly productive work bay. The SF/9095/EV also provides two lift platform options for wheel alignment work, including rear-wheel slip plates and an integrated wheel-free scissor lift system.

The SF/9095/EV is designed primarily for installation into a floor recess, this should be prepared to Tecalemit specification. The lift requires a 3ph power supply via a 20 amp fused isolator.
