- Special heavy duty construction
- 8.0m platforms as standard
- Option to order with extended platforms

# Leviathan 16t 4 Post Commercial Vehicle Lift

GARAGE EQUIPMENT  
since 1922

## → About the SF/8898/V

The Leviathan 16t commercial vehicle lift from Tecalemit is heavy-duty. The lift platforms incorporate heavy gauge materials and unique designs to ensure total lifting safety, durability, and performance. The lift is powered by a 5.5kW motor operated from a single control box mounted on the master column.

The lift has been configured to accommodate a broad range of longer wheelbase, commercial, and public service vehicles up to a gross vehicle weight of 16000kg.

Design features include an additional width of 3500mm between the columns (allowing access for vehicles with fixed rear view mirrors) and 810mm wide platforms to ensure that twin-wheeled vehicles are fully supported by the platform.

The lift should be installed in a covered area protected from prevailing weather. Consult your Tecalemit Area Sales Manager for floor specifications and power supply requirements.

## → Technical Specifications & Dimensions
